DESCRIPTION

Certified on October 23, 1988, the Cirrus SR20 is a four-seat, composite aircraft. Over a thousand SR20s have been sold since deliveries began in 1999. One of the major selling points for the SR20 is its Cirrus Perspective avionics suite (by Garmin) with dual 10-inch or 12-inch screens: one primary flight display (PFD) and one multi-function display (MFD). This provides all standard communication, navigation (GPS and conventional VHF), and surveillance (Mode S transponder) functions. Other avionics features include in-flight weather information and TCAS-like traffic information.
